Profile

As a software engineer, I graduated in 2021 and I have over 2 years of work experience. and Since I'm a fluent English speaker that helped me learn all about web development by searching, learning, and applying, additionally, I helped a few friends build some real-life web projects in their freelancing career. Now I hope to find a position as a frontend web developer, regardless of the salary.

Professional Experience

Freelancer Assistant, Upwork

2019

In 2019 I started helping my friends in their freelancing careers but I was in college so I didn't have enough time to start mine.

Frontend Web Developer

2021

Ever since I graduated I started working on my personal projects to learn new skills and techniques, You can check some of them on my GitHub.

Courses

React.js, Udemy

2021

React - The Complete Guide (incl Hooks, React Router, Redux).

Education

Bachelor of Science major in Computer Science, Helwan University
2021

Overall grade : Good,
Graduation project : Excellent.

Projects

Portfolio, using (React.js)

This project is my Portfolio, it shows information about me and exhibits my work, also it provides different methods to contact me. (Fully Responsive)

Technologies: React.js, Email.js, Swiper.js & React Icons.
